1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-27 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-21 of copending Application No. 11/119,304. Although the conflicting claims are not identical, they are not patentably distinct from each other because each discloses a fibrous sheet having a deliquescent salt deposited thereon.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 1-27 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of copending Application No. 10/745,182. Although the conflicting claims are not identical, they are not patentably distinct from each other because a fibrous sheet having a deliquescent salt such as calcium chloride or lithium chloride applied thereto.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-27 are rejected under 35 U.S.C. 103(a) as obvious over JP 05-105705 machine translation attached. JP '705 discloses a fibrous sheet to which a solution which comprises calcium chloride or lithium chloride is applied in an amount of 10-1000 parts per 100 parts of the fibrous sheet. The binders applied include water soluble binders and therefore meet the limitations of claims 26 and 27. See abstract as well as paragraphs 0008, 0010, 0012. JP '705 differs from the claimed invention because it does not disclose the equilibrium moisture content or the dry bulk of the fibrous sheet. With regard to the equilibrium moisture content, when the reference discloses all the limitations of a claim except a property or function, and the examiner cannot determine whether or not the reference inherently possesses properties which anticipate or render obvious the claimed invention the examiner has basis for shifting the burden of proof to applicant as in *In re Fitzgerald*, 619 F.2d 67, 205 USPQ 594 (CCPA 1980). See MPEP §§ 2112- 2112.02. With regard to the dry bulk of the fibrous sheet, it would have been obvious to have selected a sheet having suitable dry bulk in order to arrive at a material having sufficient strength, durability, absorbency, cushioning abilities, etc. since the dry bulk would necessarily be related to these properties. With regard to the limitations that the material is a tissue, a wipe, or a paper towel, since the JP '705 material meets the

Art Unit: 1771

structural limitations of the claim, it meets these limitations. The limitations are seen as statements of intended use. Since the JP '705 is structurally the same it could be used to perform the intended use of wiping.
